## REVENUES IN 2019

# 700+
## SOFTWARE DEVELOPERS

## What is MATR?

Participants in Moody's Analytics Technology Rotation (MATR) Program are recent graduates who want to be part of a community of developers at the intersection of finance and technology. They rotate across our offices in the US, acquiring exposure to a wide variety of technologies and experiences along the way.

Waltham, MA
New York, NY
West Chester, PA
Omaha, NE
San Francisco, CA

On-boarding week
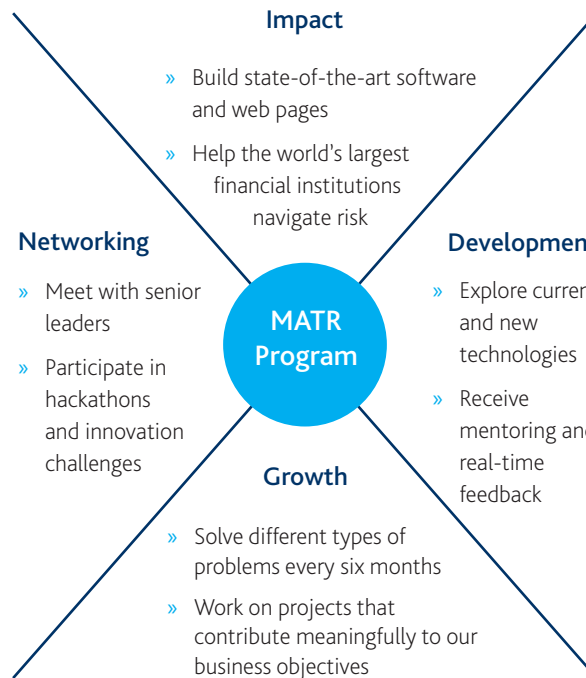

4 Rotations, 6 Months each

Final placement

Your adventure begins with a week of getting to know our company, our technology, and our people.

We do our best to match you with your preferred rotations, based on your interests and available opportunities.

At the end of two years, follow your passion into your next challenge within the company.

## Why MATR?

Our two-year rotational program offers the experiential benefits of job-hopping among start-ups with the stability and financial backing of a well-established company. When you join MATR, your curiosity will be met with a variety of challenging projects while receiving ongoing training and mentoring.

### Impact
» Build state-of-the-art software and web pages
» Help the world's largest financial institutions navigate risk

### Networking
» Meet with senior leaders
» Participate in hackathons and innovation challenges

### MATR Program

### Development
» Explore current and new technologies
» Receive mentoring and real-time feedback

### Growth
» Solve different types of problems every six months
» Work on projects that contribute meaningfully to our business objectives

## Who should MATR?

We seek curious problem solvers who enjoy learning new things, working with others, and continuously growing their interpersonal and technical skills.

Applicants should:

» Have a degree in Computer Science, Software Engineering, or a related field. Have a deep understanding of computer science fundamentals.

» Be passionate about learning and working with any or all of the following: Java, .NET, Scala, Apache Spark, Hadoop, AngularJS, React, Python, Amazon Web Services, and Microsoft Azure.

» Be transparent communicators able to build relationships within the organization and outside of it.

» Have a desire to understand the bigger picture and how your work contributes to it.
