

Dear Colleague,

The American Society of Anesthesiologists is currently developing an update of the “**Practice Guidelines for Management of the Difficult Airway**,” with the collaboration of several national and international organizations. SIAARTI is one of those organizations, and as a member, our task force is asking you to participate in the development of this important document by completing a brief opinion survey.

The intent of the survey is to assist us in validating the topics being examined, particularly regarding common clinical practices involving management of the difficult airway. The survey will require about 10 minutes of your time. To access the survey, please go to the following website:

<https://www.surveymonkey.com/r/BVW662J>

Please complete the survey by October 30, 2020. Your responses will help in the development of the final document. We hope that you will be interested in contributing your expertise and perspective to this project. With your assistance, we are confident that the finished guidelines will help improve patient outcomes related to difficult airway management.

Note that your responses will be completely anonymous, and no identifying information will be collected from your participation in this survey.

If you have already participated in this survey within the past 3 weeks, we thank you for your earlier response, and please do not respond to this request.

Sincerely,

Jeffrey L. Apfelbaum, M.D., (Task Force Co-Chair)
Carin A. Hagberg, M.D., FASA (Co-chair)
Massimiliano Sorbello, M.D.
Robert Greif, M.D., MME, FERC

Basem Abdelmalak, M.D., FASA
Madhulika Agarkar, M.P.H.
Richard T. Connis, Ph.D.
Richard P. Dutton, M.D., M.B.A.
John Fiadjoe, M.D.
P. Allan Klock, Jr., M.D.
David Mercier M.D.
Sheila Nainan Myatra, M.D., FCCM, FICCM
Ellen O'Sullivan. FRCA, FCA
William Rosenblatt, M.D.
Avery Tung, M.D.
