

## KBA Datasheet

This sheet shows you the data we have on this KBA and explains what additional information is needed about the site.

Please submit any information using the KBA response sheet (separate download), and send it to [gfw.cep.update@gmail.com](mailto:gfw.cep.update@gmail.com)

Country:	Cameroon
KBA name:	Mount Lefo
KBA number:	29690
KBA status:	Global

### 1. Species at the KBA

**Data needed: confirmation of the presence of species listed here, and estimates of abundance, such as survey/count/census results – please enter any information on a KBA response sheet**

- The following species have been recorded at the site in numbers which meet the criteria for a global KBA:

MAMMALIA
Lophuromys eisentrauti

- The following species have been recorded at the KBA. Data on population/abundance is needed to evaluate if they occur in significant numbers:

MAMMALIA
Hybomys badius

- The following species have NOT been recorded at the KBA, but modelling of range and habitat shows that they might occur in significant numbers. Data is needed to confirm their presence and population/abundance:

ACTINOPTERYGII
Chiloglanis sanagaensis
Doumea sanaga
Marcusenius sanagaensis

AVES
Platysteira laticincta
Ploceus bannermani
Tauraco bannermani
Tringa erythropus

REPTILIA
Trioceros pfefferi
Trioceros quadricornis
Trioceros serratus

AMPHIBIA
Astylosternus ranoides
Cardioglossa oreas
Hyperolius ademetzi
Leptodactylodon perreti
Werneria bambutensis

MAMMALIA
Allochrocebus preussi
Crocidura manengubae
Myosorex okuensis
Sylvisorex silvanorum

## 2. KBA Boundary

**Data needed: Information on issues with the boundary, or new information to help improve delineation of the boundary – please enter any information on a KBA response sheet**

- Basemap does not give sufficient detail to assess the boundary
- Better boundary map or basemap needed

## 3. Land use change

**Data needed: data on changes in important habitats and land use at the KBA – please enter any information on a KBA response sheet**

- This KBA lost 0.1 km<sup>2</sup> of forest (5.1% of forest cover) between 2014 and 2023.

## 4. Threats

**Data needed: information on threats which are affecting the important habitats and species at the KBA – please enter any information on a KBA response sheet**

- No data is available on threats at this KBA
