upleveled

Extensive program

Full Stack Web Development

Transform your teams through tech talents and essential coding skills.

Boost your tech teams with UpLeveled

Access to developers and IT personnel is a bigger threat to business success than access to capital. The lack of specialists in tech is evergrowing and fueled by an increasing pace of digitalization and although the demand for Senior Engineers never fades, they aren't utilized in the most impactful way.

UpLeveled educates highly motivated professionals in a cutting edge tech stack, incl. JavaScript, TypeScript, Node.js, PostgreSQL, React, Next.js and more to provide skilled candidates and help companies boost their team productivity.

Unlock the potential of your workforce through our extensive coding program. Whether you're looking to hire skilled graduates or upskill your current staff, our program offers just the solution to meet your organization's evolving tech needs.

Explore course format options such as immersive experiences or flexible studying, dive into our state-of-the-art curriculum designed to reflect industry demands, and learn about costs and funding opportunities to support your investment in talent development.

Discover how investing in our training can advance your team's capabilities and drive innovation across your projects.

Skilled people for your needs

We make sure our alumni hit the ground running.

Our coding program not only produces graduates equipped with cutting-edge skills in the latest technologies and frameworks but also cultivates essential transferable skills like problem-solving and collaboration. Whether you're looking to hire fresh talent or upskill your existing team: Explore how our job-ready training, emphasis on industry best practices, and unique skill combinations can boost your workforce's capabilities.

Cutting-Edge Curriculum

Graduates have gone through a state-of-the-art syllabus of coding languages and frameworks

Job-Ready Training

We simulate tech workflows, Scrum/Agile methodologies, and prepare for real-world scenarios of the tech industry.

GitHub Portfolio

Assess candidates by checking out their repositories, wireframes and more on GitHub

Unique Skill Combinations

Intrinsic motivation, resilience and good working habits meet work experience and relevant core skills

Transferable Skills

We focus on strong problem solving techniques, collaboration, fundamentals and best practices

Ready to Hire

Our graduates are fully prepared to join your team and make an immediate impact from day one.

What others say about us

With 300+ graduates and more than 150 different companies employing UpLeveled alumni, there are many stories to share...

Follow us on LinkedIn and Instagram for more feedback from students and employers and many insights into what we do to get people job-ready.

Oliver Spann

Coding Academy Lead @ Sportradar

Our top teams excel not just in technical skills but also in communication, organization, adaptability, empathy, and leadership. UpLeveled graduates embody these qualities, making them exceptional collaborators.

Renate Meßner

Managin Director @ SynerGIS

UpLeveled is a game-changer for sourcing skilled young IT-professionals. They excel in fostering collaboration and connections between talent and employers, with a dedication to truly understand industry needs.

Rudi Lindenhofer

CEO & Partner @ Moonshiner

The UpLeveled graduates have been a great addition to our teams! Their mindset and tech skills, the energy they bring - everything is top-notch. We're looking forward to hiring more of them.

Monika Leontine Honig

Head of HR @ Apoverlag

I am so grateful I found UpLeveled right when we really had an urgency to find developers at APOVERLAG! We couldn't be happier with the graduates who joined our team - and we even found an additional senior match through their community!

Matthias Kreuzriegler

Co-Founder @ SQUER Solutions

Our new full-stack developers were able to generate an impact on our projects from day one, thanks to their high-quality education. We are happy to have such great talents with exceptional motivation and learning abilities in our teams!

Christoph Walcher

CTO @ Necture

I love the energy and the mindset of learning and development of the UpLeveled candidates. I could feel UpLeveled's passion for connecting graduates and employers to unleash the potential of their candidates from the first minute.

Andreas Mohr

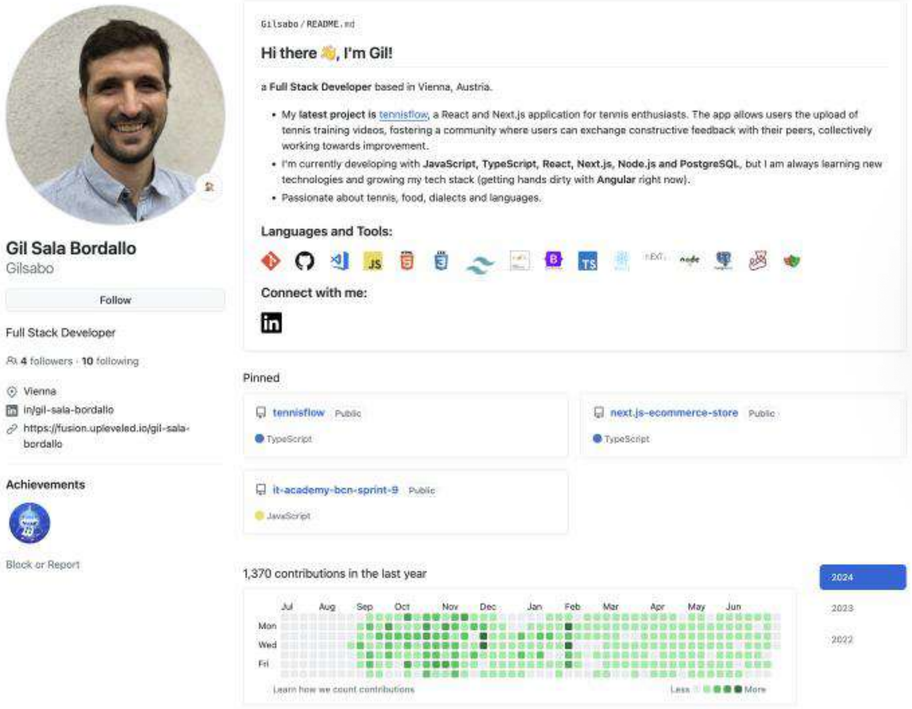

Head of SW Development @ ARA - Altstoff Recycling Austria

Our UpLeveled graduate integrated seamlessly into the development team from day one. With curiosity and a mindset of continuous learning, he switched to a new programming language without issues and can be used flexibly on different projects.

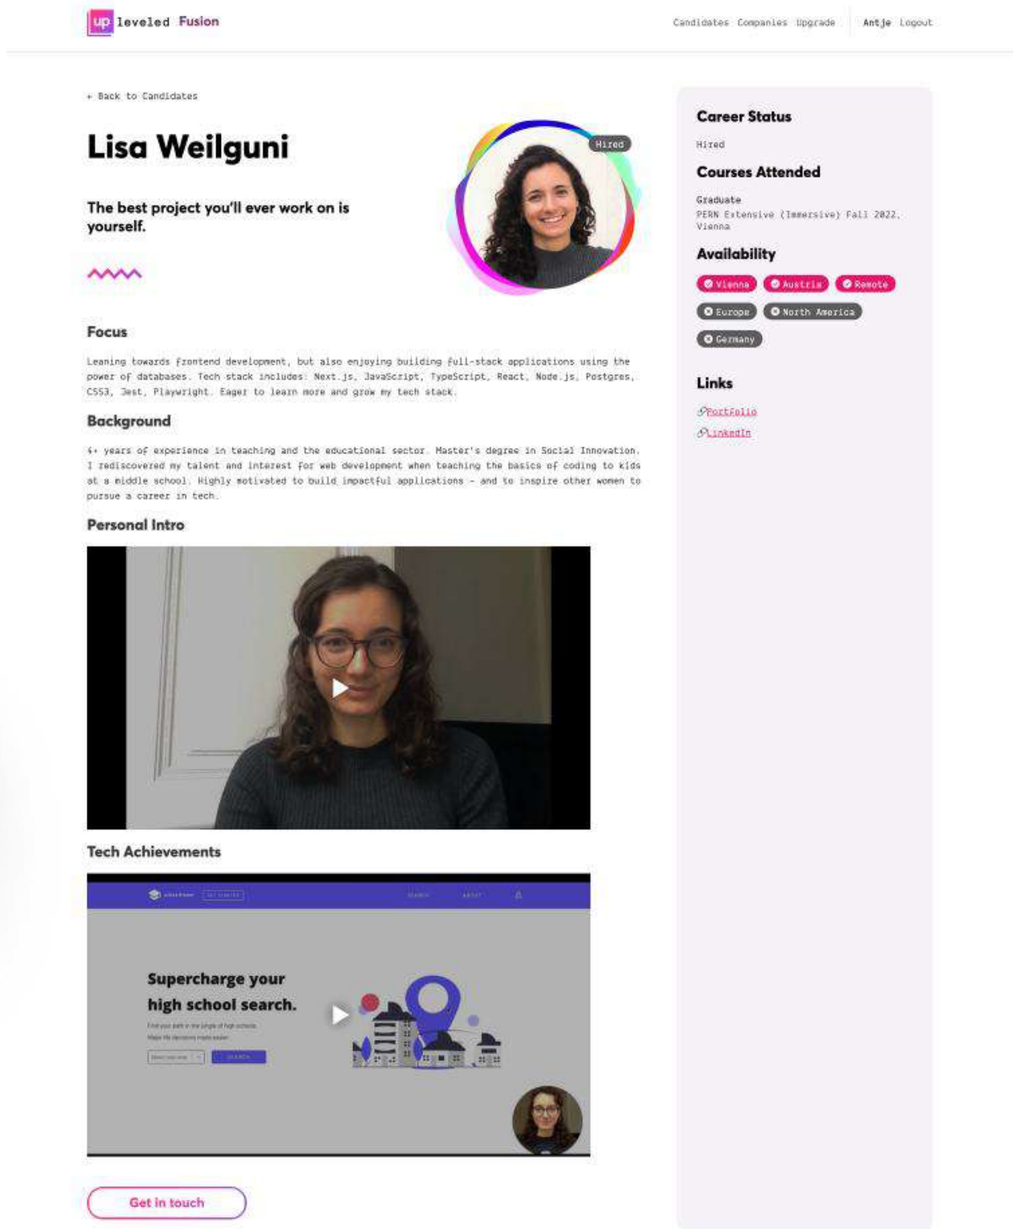

Find tech talents on UpLeveled Fusion

We make finding new team members easy:
Join UpLeveled Fusion, our online matching platform,
and explore the compelling profiles of our candidates for free.

Each candidate profile is designed to provide a comprehensive overview: You'll find strengths and background information, availability status, GitHub profile, a personal video introduction, and a walkthrough showcasing their tech skills. Like what you see? Don't hesitate to get in touch directly.

Train your people, empower your teams

Unlock the full potential of your workforce by upskilling employees through our coding program.

Instead of navigating the challenges of onboarding external candidates, leverage the dedication of your existing team while equipping them with cutting-edge coding skills and essential tech competencies.

Marketing Assistant to

UI/UX Engineer

Faster Integration

Minimize the time and resources needed for onboarding. Your employees are already familiar with your company culture, projects, and internal systems, allowing for a smoother transition into new roles and responsibilities.

Cost Efficiency

Avoid the costs associated with recruitment, such as hiring fees and external candidate salaries during the learning curve. Upskilling also reduces turnover costs by retaining experienced employees who are already committed to your organization.

Loyalty Boost

Provide opportunities for professional growth through upskilling and demonstrate a commitment to your employees' development. This increases morale, and encourages retention within your workforce.

Funding Options

Benefit from various funding options, such as Digi-Winner by WAFF or Skills-Scheck by FFG. Our program is eligible for Educational Leave and Educational Part-time, and is Ö-Cert certified, unlocking several funding options for both employees and employers throughout Austria and Europe.

Improved Team Dynamics

Maintain continuity and strengthen the overall cultural fit within your organization. Existing staff members are already integrated into your team's dynamics and understand your company's values and goals.

State-of-the-art curriculum

Our full stack program covers all job-relevant areas of web development. The hands-on syllabus comes with lots of projects and is flexible enough for participants to decide on their individual focus areas.

Frontend Development

JavaScript
TypeScript
HTML
CSS (incl. Media Queries)
React
Data Fetching (GraphQL)
Accessibility
User Experience (UX)
Design/Layout
SEO

Choose your format

Immersive experience or full flexibility: We have a format that suits your needs!

Our immersive coding bootcamp has already proven to be highly successful in transforming employees from various backgrounds into top-notch tech professionals.
Our new flexible full stack curriculum now also allows employees to learn at their own pace.
Either way: We empower your people with frequent personal support from our dedicated trainer team, an extensive tech deep dive and a focus on transferable skills.

	Immersive	Flex
Time & Place		
Duration	12 weeks + prep	24-72 weeks + prep
Start dates	January/May/September	flexible
Preparation phase	120 hours before start	120 hours before start
Pace	scheduled	flexible
Location	on-site & online	online
Lectures	live-streamed	pre-recorded
Fully remote option	✓	✓
Content & Support		
Curriculum	Full Stack Web Development (PERN)	Full Stack Web Development (PERN)

Educational leave & part-time	✓	✓

Option A - Immersive format

Transform your team fast with 12 weeks of bootcamp-style learning. Immerse your employees in a collaborative environment, whether on-site in our learning spaces or fully remote, to rapidly enhance their skills and productivity.

Ideal for Educational Leave

Live & interactive lectures
Live-streamed via Zoom
Recorded for future repetition

Personal trainer support wherever you need it: in-person or online

A place to study & focus, to collaborate, chat and hang out, to work out or work on coding projects: The Social Hub

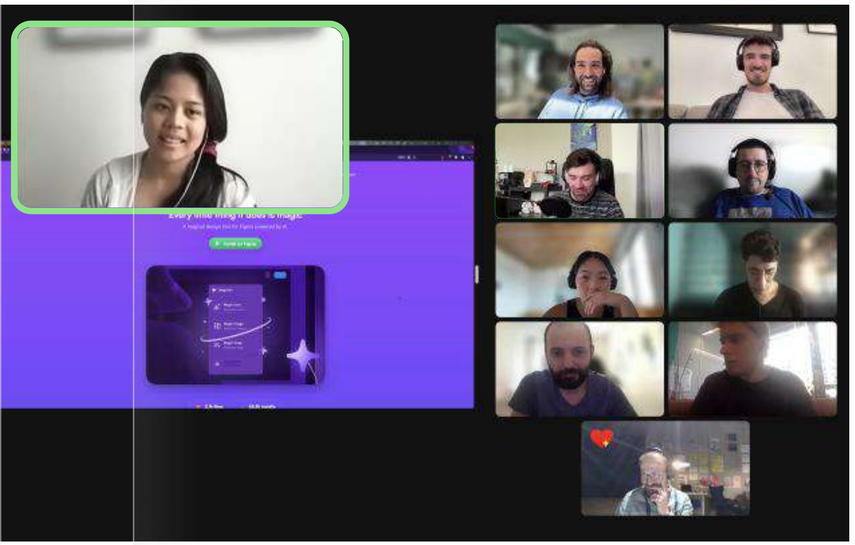

Daily schedule (Mo-Fr) for 12 weeks

9am	10am	11am	12pm	1pm	2pm	3pm	4pm	5pm	6pm
Daily	Live Lecture			Lunch Break	Project Time				
self-study	self-study	self-study	self-study	self-study	self-study	self-study	self-study	self-study	self-study

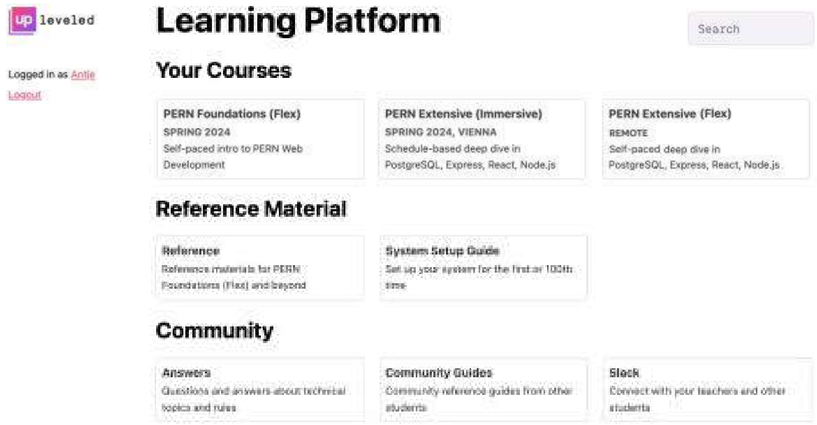

Option B - Flexible format

Empower your employees at their own pace. With frequent personal support from our trainer team, your team members can effectively balance work and professional development without disrupting your business operations.

Ideal for Educational Part-time

Pre-recorded lectures, code-alongs, and transcripts, up-to-date and in-sync with the respective project assignments

Lecture notes and project work, training areas and exercises, further reading and many more resources on our Learning Platform and GitHub

Project reviews, personal support and individual mentoring by our trainer team, via Slack, Google Meet and Zoom

Schedule of the full program

ongoing, as needed	min. 4 weeks	min. 24 weeks, max. 72 weeks
Assessing Training Needs	**Prep Course**	**Self-study, Project Work, Support & Mentoring**
Evaluation	Enrollment	Kick-off extensive program — Mentoring and Onboarding

Pricing & Funding

UpLeveled is a certified quality provider and therefor supported by a range of institutions and funding programs in Austria in Europe.

We are certified according to the global ISO:9001 standard and recognised by the Austrian Ö-Cert organisation, which qualifies our courses for educational leave and different financial support programs.

Pricing

Course costs

- € 9.990 net

Hiring of graduates

- free of charge

Fusion premium services

- Early access
- Company presentation
- Open doors day

Hiring from our senior network

- upon request: hi@upleveled.io

Educational Leave & Part-time

Requirements

- 6 months of continuous employment in AT
- Confirmation of employer

Options

- Educational leave to join full-time in the immersive format and Educational part-time to join the flexible program on the side - both formats are eligible for funding.

Benefits

- No costs for employer during leave. Part-time model allows for working while studying
- Minor income possible in addition to monthly AMS allowance
- Course cost funding available for both the student and the employer

Course Cost Funding

Who

- Employees with residency in Austria
- Employers registered in Austria

What

- Partial or full funding of course costs, depending on state, program, income etc.
- E.g. “DigiWinner” or “Skills Schecks”

Where

- Vienna: WAFF (employees)
- Vienna: Vienna Business Agency (self-empl.)
- Austria: Arbeiterkammer (participants)
- Austria: FFG Skills Schecks (employers)
- Austria: State Funding Organisations

Where can you find us?

UpLeveled teams are based in Vienna, Austria, and Amsterdam, Netherlands, and are there to support you on-site and online.

Immersive students get free access to learning spaces at The Social Hub in various European cities. But being active Open Source contributors and well connected in the international tech scene, we are used to collaborating across the globe and well equipped to guide people online-only, too.

Vienna, AT

The Social Hub, Vienna

Peer-to-peer learning and meeting the trainers in a vibrant co-working space.

Amsterdam, NL

The Social Hub, Amsterdam

Peer-to-peer learning and meeting the trainers in a vibrant co-working space.

Europe

Your city of choice

Joining from another European city? Talk to us about your options.

Remote

Online

Collaboration, reviews and individual support online via Slack, Zoom and other platforms.
