

RawMaterials ACCELERATOR

Bring your idea to the market

Co-funded by the
European Union

Are you the next top innovation team offering radically sustainable products or services in the raw materials sector? Bring your solution to the market, apply for the RawMaterials Accelerator!

The RawMaterials Accelerator is a programme for innovative teams and is made up of three phases that build on each other. Participants engage in group work as well as individual coaching to improve their product and business model. At the same time we open up introductions on a pan-European level to partners of the EIT RawMaterials Innovation Community and anchor start-ups in their local and national ecosystems.

Phase 1 Explore

3 months of expert business coaching with a focus on building a proof of concept for your business model and discovering your market niche

€15k

Phase 2 Build

6 months, supports your validation of customer needs and verification of business assumptions while identifying criteria for market entry

€30k

Phase 3 Grow

9-12 months, gets your business ready for launch through market entry, raising financing and expansion of your team

€45k

The RawMaterials Accelerator introduces start-up teams to potential customers from the EIT RawMaterials partner network willing to adopt innovations. The Accelerator Programme aims to develop start-ups so that they can rapidly become suppliers to, and perhaps future partners of, the EIT RawMaterials network.
