

# CTIA Smart Cities Program

**Becoming a smart city is accessible, desirable, and achievable for communities of any size and state of readiness.**

Join wireless technology experts specializing in advanced smart cities deployments to help educate municipalities and each other about the benefits of wireless-enabled solutions—and how intelligent deployments contribute to more efficient services, safer communities, and improved quality of life.

## Our Goals

- 01 Create educational tools
- 02 Encourage technology adoption
- 03 Establish best practices and industry resources
- 04 Share information and challenges
- 05 Expand knowledge and connections

**Our member working groups include connected utilities, transportation, public services, and buildings.**

### Smart Utilities

- Commercial carrier and private cellular networks
- IoT device security
- SCADA modernization
- Advanced wireless communications attachments

### Smart Transportation

- Intelligent transportation systems
- Connected and autonomous vehicles
- EV infrastructure
- V2X communications

### Smart Public Services, Safety and Education

- Approaches to connectivity
- Data management and analytics
- Digital equity
- Advanced safety solutions

### Smart Buildings

- In-building connectivity
- Edge computing
- IoT solutions
- Sustainability

# Educational Resources

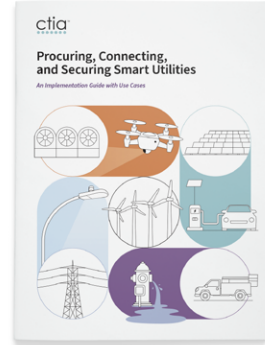

## The Smart Cities Wireless Maturity Model

[This free online assessment tool](#) tabulates wireless readiness for smart cities solutions and helps communities take the next step to a more connected, sustainable, and safe tomorrow. With this tool, communities, individual departments within municipalities, and utility providers have a chance to test their readiness for smart transportation, utilities, and public services and see if their critical services are tracking towards the technologies of yesterday, today, or tomorrow.

## The Smart Cities Playbook Series and Use Case Guides

[Jump into](#) our collaborative, educational series of Playbooks to find real-life examples of smart cities deployments in action, as well as strategy considerations, best practices, and demonstrated benefits of advanced wireless solutions.

## Upcoming Events

Join our members for in-person gatherings in 2024. We plan to meet in Orlando, FL; Raleigh, NC; Kansas City, MO; and Milwaukee, WI. Visit [smartcities.ctia.org](http://smartcities.ctia.org) for the latest meeting details.

**New to CTIA?** CTIA represents the U.S. wireless communications industry. CTIA members benefit from advocacy at all levels of government--for policies that foster continued innovation, investment, and economic impact across America's competitive and world-leading mobile ecosystem, including the wireless policies that will build America's smart cities.

### CTIA Smart Cities Member Companies

### Industry Partners
