

Ready to Talk Security, Interoperability, and Standards?

Town Square CTIA Smart Cities™ has the in-depth, interactive workshop for you

You're bringing all of the smart cities pieces together for a connected utility solution like a smart grid or connected streetlights. And you have a host of questions, like:

4G and 5G—how can you put cellular connectivity to work for you?

What are the latest trends in IoT devices, best practices for embedded SIM cards, and the best ways to manage power consumption?

How can you effectively integrate IoT device security into your connected utility deployments?

How are concepts like cybersecurity standards continuing to shape the future?

Talk through these answers during our guided workshop discussion with industry subject matter experts.

Monday, March 24 at DISTRIBUTECH 2025.

Setting the Standard for Connected Utility Deployments

Monday, March 24, 2-4 PM CT – ROOM D166

townsquare®

Plan • Secure • Connect

RSVP today

for the two-hour workshop of roundtables, conversations, and refreshments with device manufacturers, integrators, network providers, and utilities experts.

Erik Varney
Verizon

Join the Conversation on Certification, Connectivity, and More

We've strategically designed the agenda to make the most out of our two hours together.

2-2:30 PM Interactive roundtable discussions put you face to face with utility veterans as they share their challenges and solutions for connected utility deployments.

2:30-3 PM All about connectivity! In the next half hour, take away advice on mapping connectivity, exploring the maturity of your current solutions, and securing devices on 4G/5G networks for connected utility deployments.

3-3:30 PM Reconvene for a utility IoT roundup, a lightning round of what's new in devices, best practices, and connected utility deployments.

3:30-4 PM Time for some well-earned refreshments. Keep the conversation going, for insights and connections that will last long after DISTRIBUTECH 2025.

Take home a one-stop resource for navigating connected utilities and mapping, assessing, maturing, and securing connectivity. Workshop attendance includes a comprehensive workbook of tools, tips, and best practices, to move your DISTRIBUTECH 2025 conversations to action and tangible results in your community.

Setting the Standard for Connected Utility Deployments

**Monday, March 24, 2-4 PM CT
at DISTRIBUTECH 2025**

Join your fellow IoT VIPs in the value-packed session that puts you and your projects at the heart of the conversation. Reserve your spot today at: <https://www.distributech.com/2025-event-schedule/setting-standard-connected-utility-deployments-ctia-connectivity-workshop>
